

## Scope of Work

- Design & integrate broadcast equipment into two state-of-the-art vehicles.
- Wire entire system.
- Configure & test all equipment to ensure vehicles are ready for field deployment.

*Space, performance, flexibility & reliability are the key elements in any good mobile vehicle design. Azzurro has the experience needed to deliver these elements to our clients.*

## The Challenge

- Build two custom mobile production van interiors from scratch based on TWC's designated equipment list in a short turnaround time.
- Design with space constraints in mind without sacrificing equipment performance.
- Customization to incorporate significant production equipment and value into a small footprint.

## The Technology

- Ross Carbonite 2M Two M/E Production Switchers
- ZEPLAY multichannel instant replay technology
- Evertz Routing & Distribution Systems
- ClearCom Intercom
- JVC GY-HM790U ProHD Cameras
- Telecast Fiber Camera Extension System
- Yamaha Audio Mixing Consoles
- Harris and AJA Frame Synchronizers and Converters

## The Project

Azzurro Systems Integration outfitted two custom Sprinter Vans for Time Warner Cable's – YNN News Mobile Production Unit Fleet. The vans are primarily used to cover Sports and Entertainment events in an effort to broaden TWC's live event coverage presence.

Both vans are equipped with state of the art production equipment, initially outfitted with three JVC ProHD cameras and upgradeable for future expansion up to five cameras.

Both vans are outfitted with Ross Carbonite Production Switchers, AJA Ki pro Recorders for Recording and Playback and utilize the ZEPLAY Multichannel Instant replay technology platform by Tightrope Media.
